Petty's Garage Single Strut Tower Brace Part # PG-STB-011 Install Instructions

Required Tools:

- 13mm Wrench/Socket

Installation Instructions:

1. Use 13mm wrench/socket to remove the 6 upper strut mounting nuts. (Top/Middle Photo)
2. Install provided 6 spacers over threaded strut mount studs. **Make sure spacer with purple sticker is installed on outer most stud of passenger side. (S Arrow in Top Photo)**
3. Position strut tower brace over strut mount studs/spacers and reinstall nuts. Torque nuts to 35 ft/lbs.
